

CALL FOR PAPERS: SSTAR 2021

SSTAR 46th Annual Meeting: April 29-May 2, 2021

Papers are now being accepted for consideration for the 46th Annual Meeting of the Society for Sex Therapy and Research (SSTAR). SSTAR meetings are devoted to understanding and treating sexual disorders within cultural context such as sexual dysfunctions, gender and sexual orientation challenges, and paraphilias. Abstracts may include hypothesis-driven research, clinical observation, or theoretical formulations. Papers may be given orally or in poster format. Judging selection for various awards begins with the abstracts. New poster award categories will include recognition for research that focuses on diverse groups and we encourage submission of this work.

REMINDER that Submission Deadline is September 18, 2020

Details on submission requirements can be found below

MATERIALS REQUIRED FOR SUBMISSION

**PLEASE SUBMIT MATERIALS AS A WORD DOCUMENT AND E-MAIL ATTACHMENTS
TO: Stephanie Kuffel, PhD**

I. Abstract

- A. Prepare your abstract in the same format as the sample below. The abstract may be no longer than the two-page example below.
- B. All abstracts must be prepared as a Word document in 12 point Times New Roman font, fully justified, with margins of 1.00" on the left and 0.75" on the top, bottom, and right.
- C. The abstract must be named "Yourlastname_Abstract_SSTAR2020.doc," (e.g., Jones_Abstract_SSTAR2020.doc) and submitted electronically to swkuffel@qwestoffice.net

D. Abstracts must include:

1. Title of the proposed presentation (bolded, capitalized, and centered)
2. Names and degrees of the authors (bolded and centered)
3. Presenting author's name and degrees (bolded and centered), affiliation, address, telephone number, and e-mail address, twitter handle if applicable (@johnsample), (centered)
4. An abstract that includes: (a) an introduction, (b) method, (c) results, (d) discussion, and (e) utility/limitations/risks (The abstract may be no longer than the example below.)
5. Two or three behavioral learning objectives that state what the person attending your presentation should be able to do differently as a result of what he or she has learned from your presentation. The behavioral learning objectives should use action verbs like explain, discuss, compare, define, identify, recognize, use, predict, detect, appraise, diagnose, or interpret and avoid vague verbs like appreciate, know, learn, understand, or believe.
6. A list of references in American Psychological Association (APA) format. References MUST be included with the abstract. References can only be journal articles (NOT books or book chapters) and it is recommended that they be from the last 5 – 7 years for currency.
7. A brief biography of the presenting author

II. Curriculum Vitae

A. Each author and co-author must submit their CV, electronically, as a Word document to Stephanie Kuffel, PhD, swkuffel@qwestoffice.net. Each CV should be named "Yourlastname_CV_SSTAR2020.doc." e.g., Jones_CV_SSTAR2020.doc.

SEXUAL DYSFUNCTION IN THE NACIREMA

John Sample, PhD and Mary Abstract, MD

Introduction: Since Miner's initial work on the Nacirema (1956), little further investigation has occurred of this North American group that lives in the territory between the Canadian Cree and the Yaqui and Tarahumare of Mexico. We recently had the opportunity to interview a representative sample of the Nacireman people regarding the prevalence of sexual dysfunction.

Method: Using census data, we randomly sampled 250 Naciremans. We used a translated version of the Universal Survey of Sexual Dysfunction and obtained written informed consent before conducting face-to-face interviews. 87% of the target sample completed the interviews.

Results: Forty percent of the Nacirema reported no problems in their sexual functioning, 30% reported one problem, 20% reported two problems, and 10% reported three or more problems. With regard to problems in the three major areas (desire, arousal, and orgasm), 25% reported a desire problem, 35% reported an arousal problem, and 40% reported an orgasm problem.

Discussion: Comparisons of the prevalence of sexual dysfunction in this culture to the prevalence in other cultures are made. The rates of sexual problems in the Nacirema are quite different from those reported in the United States by the National Health and Social Life survey. The levels of complexity, tightness/looseness, and collectivism/individualism in the two cultures do not fully explain these differences.

Utility/Limitations/Risks: The results of this study will help therapists and researchers working with this population, but the results are limited by the small sample size.

Behavioral Learning Objectives:

After attending this presentation, the participants will be able to:

- 1 Explain the importance of a representative sample for epidemiological research
- 2 Discuss the prevalence of sexual dysfunction in the Nacirema
- 3 Compare the prevalence of sexual dysfunction in the Nacirema to the prevalence in other cultures
